

Stephen Curry

Slip and Falls in the NBA

Remember Game 4 of the NBA Playoffs, Warriors vs the Rockets? Stephen Curry slipped and smacked his right knee against the floor. According to a team spokesperson, “Curry suffered a right knee sprain when he slipped on a wet spot and fell awkwardly to the floor.” He did not return and missed the remainder of Game 4.

An injury such as this can not only be a game changer but it can be a career changer. We need to protect the players, and address the amount of injuries resulting from slip and falls on the basketball court.

Safe Space Ingenuity (SSI) is a floor safety consulting firm. We believe that with slip-testing and monitoring, injuries such as the one suffered by Stephen Curry, may be avoidable in the future. We use state-of-the-art technology to measure the slip resistance potential of all hard walkway surfaces (i.e., basketball courts). SSI has put together an initiative that would ultimately reduce the potential for slip and falls on the court and protect the players.
